Coupe Health, LLC is an independent company that provides benefit design services.

Blue Cross® and Blue Shield® of Minnesota and Blue Plus® are nonprofit independent licensees of the Blue Cross and Blue Shield Association.

Introduction

Blue Cross and Blue Shield of Minnesota and Blue Plus (Blue Cross) are pleased to present the FlexRx drug formulary (drug list). Our goal is to give members access to safe and effective prescription drugs at a reasonable cost.

Drugs not listed in this formulary are non-preferred. Blue Cross may choose to not add a drug to the formulary because of effectiveness or safety concerns, or because a similar, more cost-effective drug is already on the formulary. New drugs may not be covered or may be non-preferred until reviewed and approved for inclusion by the Pharmacy and Therapeutics (P&T) Committee and Coverage Committee.

Blue Cross encourages providers to prescribe preferred drugs.

Your drug benefit is presented in the Drug Formulary, and includes most prescription drugs, although some restrictions and exclusions do apply. For example, investigational drugs or drugs indicated for cosmetic purposes (e.g., Propecia for hair growth) may not be eligible for coverage under your prescription drug benefit. Some drugs may only be available through your medical benefit. Coverage and copayment levels vary depending on the plan. This prescription drug benefit places prescription drugs into the following Copay/Coinsurance levels:

- Preferred generic drugs
- Preferred brand drugs
- Non-preferred generic drugs
- Non-preferred brand drugs
- Specialty drugs

There are various types of pharmacy benefit programs. To understand which program you have, please refer to your Member Booklet or call the number on your member ID card for more information.

Pharmacy and Therapeutics (P&T) Committee and Coverage Committee

The Blue Cross Coverage Committee selects drugs for this formulary based on recommendations of an independent Pharmacy and Therapeutics (P&T) Committee that includes practicing physicians and pharmacists. Decisions to add or remove drugs from the FlexRx formulary are based on the drug's safety, effectiveness, uniqueness and cost. The P&T Committee and Coverage Committee meet at least quarterly. All drugs are reviewed each year as required by the National Committee on Quality Assurance (NCQA) standards.

You can find recent changes and the current version of the formulary at [coupehealth.com](https://www.coupehealth.com).

Formulary Guidelines

The requirement of P&T and Coverage Committee review is a precondition of Blue Cross coverage and:

- Applies in addition to all other conditions and terms stated in Blue Cross contracts and stated herein; and
- Applies to drugs and select medical devices when administered in any manner that is approved by the U.S. Food and Drug Administration (FDA); and
- Applies to approved drugs legally prescribed and select medical devices legally used when administered in any manner that is not mentioned in the labeling approved by the FDA (referred to as an “off-label” use). Use of a drug or medical device for an indication, dosage form, dose regimen, population, or other use parameter not mentioned in the approved labeling is considered to be an “off-label” use.

These guidelines in no way imply that members should not receive specific services based on the recommendation of the provider. These guidelines govern coverage and not clinical practices. Providers are responsible for giving medical advice and treating members. Members with specific health care needs should consult an appropriate health care provider.

Members and providers have the right to appeal coverage decisions. These rights are explained in member and provider plan documents. Members with questions about appeal rights should call customer service at the number on the back of their member ID card. Providers can call provider services at **833-749-1974**.

This information is not an offer of coverage, solicitation of coverage, summary of coverage or guarantee of coverage. All products and coverage guidelines are subject to applicable laws and regulations. Member or provider coverage is contingent on all the applicable terms, conditions, limitations and exclusions of member or provider plan documents.

Formulary Addition Request

Any health care provider may request in writing that the Blue Cross Coverage Committee consider adding or deleting a drug from the formulary. All formulary requests are brought before the Coverage Committee.

Generic Drugs

Blue Cross encourages use of generic drugs as a way to provide high-quality, cost-effective care. Generic drugs are safe, effective and they may cost less than brand name drugs. Members will likely pay a lower copayment or coinsurance for a generic drug.

Frequently Asked Questions About Generics

Are generics as good as brand name drugs?

Both brand name and generic drugs must be approved by the FDA. Generic drugs meet the same high standards as brand name drugs.

Why should I take generics rather than brand name drugs?

We must all do our part to make health care affordable. One way is to be wise consumers of drugs. Generics provide the same effectiveness and safety as their brand name counterparts but are often lower in cost. This typically occurs when competition among several manufacturers who produce the generic drug, results in lower prices for it. Lower costs generally mean lower copayments for members. Generics also save money for your health plan, so it can help keep insurance premiums as low as possible.

How can I take advantage of lower-cost generics?

Ask your pharmacist for a generic whenever available. Also, talk with your health care provider about prescribing generic drugs. Most drug classes include some generic drugs.

How to Use This List

The drug list is organized into broad categories (e.g., HORMONES, DIABETES AND RELATED DRUGS). Please use the drug search function to find current information for drugs on the drug list. Generic drugs are shown in lower-case **boldface** type. Most generic drugs are followed by a reference brand drug in (parentheses). Some generic products have no reference brand. Brand prescription drugs are shown in capital letters followed by the generic name. The Requirements/Limits column displays information about whether that drug is a specialty drug or requires prior authorization, quantity limits, or step therapy. Below are the meanings of the indicators used in the Drug Tier and Requirements/Limits columns.

1. Drug Tier – Indicates the formulary tier level for each drug.

- Preferred generic drugs (Tier 1)
- Preferred brand drugs (Tier 2)

This list does not include non-preferred generic and non-preferred brand drugs that may be covered based on your benefit.

Note: For select plans, members will pay no more than \$25 per prescription per month for covered insulin products. Please refer to your specific coverage.

2. Specialty (**SP**) – Indicates this is a specialty drug.

Note: Additional information about specialty drugs can be found in this document under the topic *Benefit Programs* below.

3. Prior Authorization (**PA**) – Some drugs require prior authorization to ensure appropriate prescribing and use before a drug will be covered. Coverage may be approved after certain criteria are met. Approval is required for claims to process at network pharmacies. If the PA indicator is present, then the PA program noted is possibly applied to your benefit.

4. Quantity Limits (**QL**) – Limits the quantity (e.g., tablets, capsules, ounces, etc.) of drugs that can be dispensed over a given period of time to encourage safe and appropriate use. If the QL indicator is present, then the QL program noted is possibly applied to your benefit.

5. Step Therapy (**ST**) – Requires members to try another drug that may be more safe, clinically effective and, in some cases, less expensive, before a more expensive drug will be approved. If the ST indicator is present, then the ST program noted is possibly applied to your benefit.

Some plans may have Utilization Management (UM) programs (e.g. PA, QL, and ST) on additional drugs beyond those noted in this document.

Compounded prescriptions: Compounded prescriptions contain two or more drugs mixed together. The end product cannot be available in an equivalent commercial form. Plus, at least one ingredient must be an FDA-approved prescription drug. Compounded prescriptions are processed according to member benefits.

Injectable drugs: Self-administered injectable drugs are generally part of the pharmacy benefit and may be included on the formulary. Injectable drugs are processed according to member benefits. Some injectable drugs that need to be administered by a health care professional are covered only under the plan's medical benefit.

Non-FDA approved: Drugs that have not received FDA approval are not covered.

Benefit Programs

90dayRx

Blue Cross has an optional 90dayRx program. Members with this benefit may receive up to a 90-day supply of drugs at a reduced cost. In addition to being able to obtain up to a 90-day supply of drugs through our mail service pharmacy you may be able to receive up to a 90-day supply of drugs through a participating retail pharmacy. Please refer to your plan documents for complete coverage details.

Affordable Care Act

Please note, some drugs may have \$0 cost-sharing under the Affordable Care Act (ACA). Examples of categories of drugs that may be subject to \$0 cost share include aspirin, bowel preparation, breast cancer preventive, select contraceptive drugs and devices, fluoride supplements, folic acid supplements, iron supplements, select Human Immunodeficiency Virus (HIV) agent for pre-exposure prophylaxis (PrEP), select single agent statins, tobacco cessation, and select vaccines.

For a complete listing of products covered at \$0, refer to the ACA Preventive Drug List at [coupehealth.com](https://www.coupehealth.com).

Retail Pharmacy Vaccine Program

Blue Cross has an optional vaccine pharmacy program for flu, pneumonia, shingles, diphtheria tetanus combinations, human papillomavirus (HPV) and meningitis vaccines. Members with this benefit can simply present their health plan member ID card when visiting a participating pharmacy. The cost share will be based on their pharmacy coverage for this benefit. Members can go to [coupehealth.com](https://www.coupehealth.com) to locate network pharmacies that administer approved vaccines for Blue Cross members.

Please note that age limitations, advance registration or other requirements may apply. The availability of each vaccine may vary by individual pharmacy or location. For your convenience, you may contact the pharmacy in advance if you have questions or to make sure these services are available at a particular location.

Specialty drugs

Blue Cross has a specialty pharmacy network. Members with this benefit must obtain their specialty drugs from an in-network specialty provider or they will pay 100 percent of the drug cost. Some Blue Cross groups offer specific benefits for specialty drug products, which may include a specific cost share or network limitation regardless of tier placement. Please refer to your member booklet to determine your payment amount and the specific quantities allowed under your group's benefit. Specialty products are typically injectable drugs that can be self-administered by a patient or family member and are used to treat serious or chronic medical conditions such as multiple sclerosis, hemophilia, hepatitis, and rheumatoid arthritis.

The specialty drug vendors and drugs covered by this specialty drug benefit are listed at [coupehealth.com](https://www.coupehealth.com).

Managing Drug Usage

Utilization management programs are developed to manage appropriate use of drugs. These programs follow FDA guidelines, clinical evidence and research. They also help manage pharmacy spend in your plan.

- **Prior Authorization:** Ensures appropriate prescribing and use before a drug will be covered. Coverage may be approved after certain criteria are met.
- **Quantity Limit:** Limits the quantity (e.g., tablets, capsules, ounces, etc.) of drugs that can be dispensed over a given period of time to encourage safe and appropriate use.
- **Step Therapy:** Requires members to try another drug that may be more safe, clinically effective and, in some cases, less expensive, before a more expensive drug will be approved. This encourages usage of clinically appropriate and/or lower-cost drugs.

Remember, drug decisions are between you and your health care provider. Only you and your health care provider can determine which drug is right for you. Discuss any questions or concerns you have about drugs you are taking or are prescribed with your health care provider.

You, your prescribing health care provider, or your authorized representative can ask for a Drug List formulary exception if your drug is not on (or is being removed from) the Drug List (also known as a formulary), or the drug required as part of a prior authorization, step therapy or quantity limits has been found to be (or likely to be) not right for you or does not work as well in treating your condition.

Steps on how a prescriber may request an exception:

- For an easy way to submit prior authorization or formulary exception requests for your patients at no additional cost, consider using an electronic prior authorization tool, through CoverMyMeds®. CoverMyMeds is an online submission method for health care providers to submit requests to our pharmacy benefit manager. It eliminates traditional paper forms and faxes and greatly reduces follow-up calls. To get started, go to CoverMyMeds.com and click on the link to **Create an Account**.
- Alternatively, a prescriber may obtain a *Request for Prescription Drug Coverage Exception* request form online at **providers.bluecrossmn.com** in the Tools & Resources section. The prescriber can also obtain the form by calling provider services at **833-749-1974**.
- Submit the completed request form to the following address or fax:
